

A Lifetime Opportunity!

Prepare! Big Upward Swing Coming! A Famine in Precious Metals Exists!

Were peace to be declared tomorrow, next week, or next year, there is no doubt the so-called standard market, including the big industrial issues, would crack wide open. Why so? Simply because the product of these various companies would quickly shrink in value and company earnings be materially reduced with the cancellation of war contracts, as well as a wholesale reduction in exports. At the mention of peace the New York Stock Exchange quivers and shakes right to its vitals and it will upon every such rumor and until after the swords of the great nations of the world have been sheathed.

Now, for a moment look at the actual situation in the precious metal market. First and foremost the world's supply of these is totally inadequate to anywhere nearly meet the demands. Nations whose financial standing a few years ago was absolutely unquestioned would to-day be placed in a most serious and precarious position if compelled to show security in gold and silver for its paper currency in circulation. As the precious yellow metal (gold) may be considered withdrawn from active circulation and is being held in reserve to finance munition and other war contracts, as well as for use when the crucial period arrives, the onus therefore for incidental expenses, amounting to millions upon millions of dollars almost every hour of each day, is placed upon the precious white metal (silver) and no wonder indeed is it that prices have mounted to the highest pinnacle in over 25 years. Silver mines to-day are rolling in wealth.

Owing to the patriotism and loyalty of the investing public in meeting the second Liberty Loan, Stocks have been sacrificed on the market until at this writing unheard of opportunities are in evidence. Silver stocks paying at the present time 20 to 50% on the investment are to be had at such figures as will in a few months remind one of the time when Engels Copper was quoted at 25c per share.

The below mentioned dividend paying Stocks are certainly worthy of the attention of those in an investing frame of mind, particularly such as occupy positions from which they will in the near future derive additional remuneration, in the line of bonuses. Were this bonus invested in a Silver dividend payer, and the dividend allowed to accumulate, this accumulation would in a short time become a source of independent income.

We will gladly purchase for your account any of the above issues on half down, the dividend may either be withdrawn or credited to your account whenever they become due.
